

ITC INFOTECH

ITC Infotech, a global IT Services company, is a 100% subsidiary of the USD 3.5 billion Indian conglomerate ITC Ltd. ITC's wholly owned Information Technology subsidiary, ITC Infotech, is aggressively pursuing emerging opportunities in providing end-to-end IT solutions and services, including business process outsourcing.

Based in the picturesque ITC Infotech Park that sprawls across 35 acres in the heart of Bangalore city, and through its wholly owned subsidiaries in the UK and the US, ITC Infotech services Fortune-listed clients across North America and Europe.

The Challenge

ITC Infotech was looking for a solution for the revival of old retired PCs for their Learning Center, wherein they could save their investment by upgrading their PCs to the thin client computing with less cost.

The UNIQUENESS on the product offering inspired them to go for EVIOs.

The Solution

Parrus IT provided a thin client computing architecture by upgrading their old retired PCs by deploying an unique solution - 'EVIO'.

This has helped them to manage their IT infrastructure centrally.

EVIO products were chosen because of its uniqueness, quick time to deploy and greater control on overall environment.

“These thin clients are used primarily at Learning Center called Epicenter. This facility is used for internal trainings. And thin clients gives the opportunity to rapidly deploy complex training environments across 15-200 users”
– **says Mr. Chatterjee**

“The product was easy to install, configure and manage. Surprisingly it took less than 10 minutes to convert our old PCs/retrieval PC into a working thin client.”

Sujoy Chatterjee, AGM – IT Services
