

Tally Solutions Pvt. Ltd.

Tally Solutions Pvt. Ltd. is a reputed software products company with its headquarters in Bangalore. Its flagship product Tally is by far the most preferred accounting software for small and medium size businesses in India. According to International Data Corporation (India) Tally's market share is larger than all other accounting software brands in India combined.

Tally has extensive geographical coverage of India with regional offices located in all major cities. These offices are supplemented by Tally Authorized Service Centers (TASC) in 86 cities. Tally is now expanding globally and has established offices in London, Singapore and Dubai to better service customers world-wide. It is one of the fastest growing software companies in India according to Data Quest July 2005 report.

Tally has manpower strength of around 800 employees spread across the country.

The challenge

Tally was looking for a cost effective, reliable and easy to manage computing solution for their employees across all their offices for software applications like MS Office, MS Visio, Outlook, Acrobat and WinZip. 80 percent of their staff use these applications. Tally knew that use of PC based desktops over widely geographically dispersed offices would entail significant problems in terms of deployment, applications and upgrades installation, maintenance and support and a large IT support team.

Remote Management with Neoware Thin Clients

"We are quite impressed with thin client technology. IT administration's job is made simple through reliable, easy-to-deploy desktops and centralized management, thereby saving precious management time and resources."

IS Team, Tally

The Solution: Server-based Thin Client Computing

Based on their requirements, a detailed study was carried out by Tally and they found **'Server-based Thin Client computing'** architecture as the best solution in terms of its cost-effectiveness and simple & easy centralized manageability.

Parrus IT provided a flexible and powerful Neoware Eon e100 thin client solution in 2004 and 2005. These thin clients are installed in their corporate & regional offices at Bangalore, Delhi, Chennai and Kolkatta and are managed centrally from the corporate office at Bangalore.

The thin client solution deployed at Tally comprises of :

- Around 700 Neoware Eon e100 thin clients from Parrus IT
- Four servers from IBM – 160GB HDD X 2, 4 GB RAM, Xeon 3.06 GHz(2) 2MB L2 Cache
- 10/100/1000 Mbps Switches
- Server OS : Windows 2003 Enterprise server
- Applications : Tally, Office, Winzip, Acrobat & ERP

Neoware thin clients were chosen because of their superior features and benefits and the excellent technical expertise of Parrus IT.

"We are fully satisfied with the reduced management/maintenance computing solution offered by Neoware thin clients and are highly impressed with the strong technical support provided by Parrus IT team. We have found thin client technology to be a very good fit for our environment and we are extremely happy with its performance to date"
